Assign CPD targets to your staff to drive professionalism

Set clear annual CPD hour or credit targets by role, department or professional designation. Our platform automatically tracks progress against CPD targets in real time, prompting employees to complete required learning, upload evidence and maintain up-to-date certifications. Managers gain instant visibility of completion rates, competency development and emerging skills gaps.

Enhance & track staff skills & competencies

The **PowerHouse Upskill LMS** builds job role frameworks with required skills and competencies. Assign frameworks to your staff and/or contractors and they complete tasks, verifications and training in personalised upskilling portals. Assign **training-based skills** to your staff. As your team do their training, their competencies feature in their Workforce Wallets.
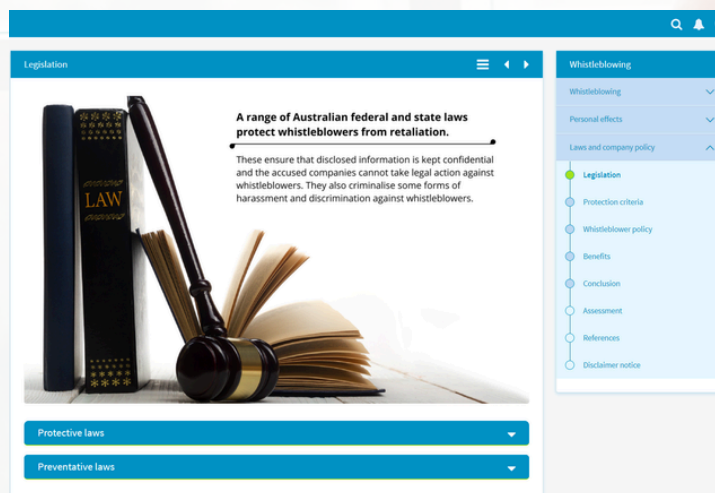

Verify the competencies & skills of your staff & teams

Assign **self-assessed skills** to your staff. They assess the level of their skills and your managers assess and provide a verification on the skill level. Assign **verified skills** to your staff. They are guided to upload video & asset evidence, & complete verifications with their managers to verify job role competencies.

## Content Publisher: Build engaging & interactive courses

The **PowerHouse Content Publisher** builds engaging and interactive courses with media, assessments and surveys.

Build professional courses with inbuilt menus that display on PC, Mac, tablets, iPads, Smartphones and iPhones.

The editor features inbuilt AI and can be published in all languages.

Fully SCORM Compliant: SCORM 1.2, 2004 and xAPI

PowerHouse Upskill is fully SCORM 1.2 & 2004 compliant. SCORM courses can be uploaded to the platform and all completion data writes to course reports.

We also provide xAPI via integration with SCORM Cloud. This allows your learners to access and complete courses from external providers. Completion data from the tests writes to the LMS database.

Training Plans: Delivering a blended learning approach

Discover skills and compliance in your workforce. Search your talent pools for a qualification, certification and/or work experience to build internal project teams.

Search pools to unearth the talent in your team to drive succession planning.

Optimising your talent drives productivity, efficiency and staff engagement/retention.

Workshops | Webinars | Workforce Wallets

Face-to-Face Training with the Event Manager

The **PowerHouse Event Module** manages your face-to-face training sessions. The functions include:
- Automatic waitlisting
- Seamless registration
- Event marketing
- Integrates with Microsoft calendar
- Automated attendance certificates
- Option to offer eCommerce/invoices

Asynchronous Training with the Webinar Manager

The **PowerHouse Webinar Module** manages online training sessions via integration with Teams, Zoom and GoTo. Features include:
- Webinar registration in the portal
- Webinar marketing
- Integrates with calendars
- Automated attendance certificates
- Option to offer eCommerce/invoices

Track progress with Workforce Wallet & Training Record

The **PowerHouse Workforce Wallet** stores learner compliance, skills and competency files with a skill/compliance gap analysis.

The **Training Record** features all completed training sessions with linked completion certificates. Allows for recording external training sessions during the time period.
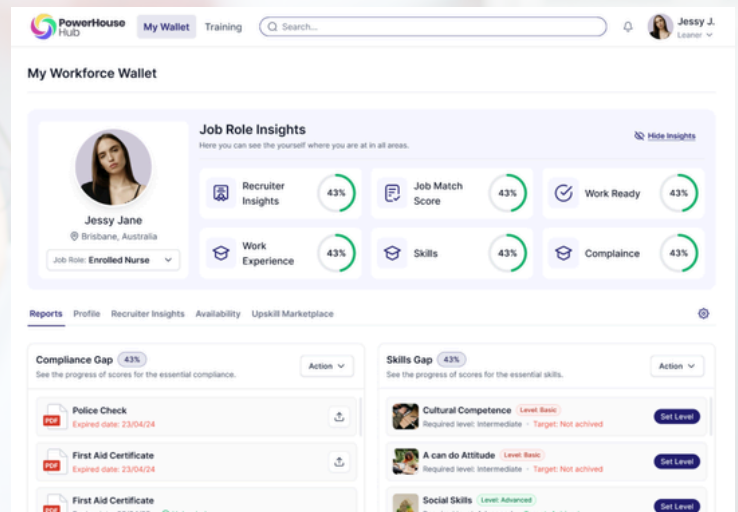

Job role training & compliance with the Framework Manager

The **PowerHouse Framework Module** builds job role profiles with skills, competency and compliance mapping.

The job role or industry framework can include courses, webinars, events, forms, file uploads and competency verification workflows.

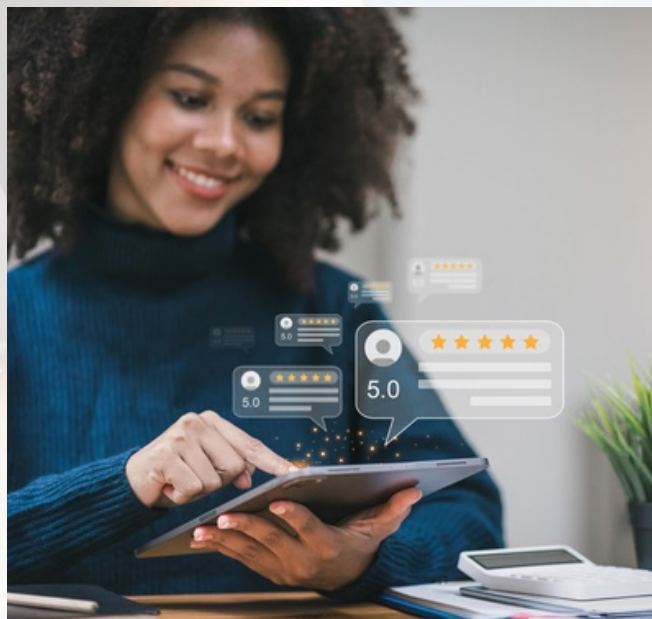

Surveys, polls, quizzes and Workforce Insights

The **PowerHouse Upskill LMS** features a wide range of user response tools including dashboard polls and quizzes.

Rated response surveys can be added to all courses, events and webinars to provide a star rating on the activities.

Users are assigned workforce insights surveys to capture sentiment & satisfaction feedback.

Collaboration and mentoring with PowerHouse Messenger

The **Messenger Module** can be enabled to allow your managers to mentor and support their team members.

Users can also create their own project groups and invite colleagues to chat and share files online in collaborative forums.

The Learner Dashboard

The Learner Dashboard provides users with a personalised portal that features their training widgets. The widgets display upcoming events and webinars, current courses and Training Plans. The dashboard presents latest news, documents to download, alerts, visual reports, surveys, polls and quizzes.

PowerHouse Upskill also presents dashboards for Managers, HR Teams and Admins.

Workforce training with PowerHouse Upskill

Build and deliver personalised job role and CPD eLearning Programs.

The PowerHouse Upskill LMS features online courses, training programs, webinars, and face-to-face training events. Customise your online learning portal, select your modules, and launch your training program for your learners.

PowerHouse Hub

"PowerHouse Upskill delivered personalised training program for our staff. The Manager dashboards meant our teams where mentored and supported. Reports are great!"
Stan R. HR Manager

"We use the Upskill LMS to deliver job role training with compliance and upskilling related to improving employee job role performance."
Sara H. CPD Manager

Deploy PowerHouse Upskill as a standalone SaaS platform or integrate the job role data and payroll systems. There is also seamless integration with your HRIS, onboarding, performance management and reporting platforms.
